Million Miles Away

[Logical Elements](#)

Friday night and I just got back
I had my eyes shut, was dreamin' 'bout the past
I thought about you while the radio played
I should've got a-movin', some reason I stayed

I started driftin' to a different place
I realized was fallin' off the face of the whole world
There was nothin' left to bring me back

I'm a million miles away, a million miles away
I'm a million miles away
There was nothin' left to bring me back today, today

I took a ride, I went downtown
The streets are empty, there's no one around
And all the fences that we used to know
Gone from the places we used to go

I'm at the wrong end of a lookin' glass
I'm tryin' to hold on to the hands of the past and you
And there was nothin' left to bring me back

I'm a million miles away, a million miles away
I'm just a million miles away
And there's nothin' left to bring me back today
Bring me back today, bring me back today

I started driftin' to a different place, oh
I realized was fallin' off the face of the whole world
There was nothin' left to bring me back

I'm a million miles away, a million miles away, oh
I'm just a million miles away
And there's nothin' left to bring me back today
Bring me back today, bring me back today
Bring me back today
