

# Company

## Gregor Samsa

Start your engines  
Start your engines  
Start your engines  
Can we get the chemicals in  
'Cause anything's better than this  
Mix it up with Vicadin  
'Cause anything's better than this  
Little cuts on your wrist  
To try and get back the feeling  
And no real friendships exists  
That would be an understatement  
You can tell me the reason  
(Cannot show up)  
Friends, you knew before  
(Hello, how have you been?)  
This is your season  
(Oh I give up)  
Just show up  
(I can't knock on your door)  
'Cause I keep bad company  
I'm trouble  
So go on, stay away from me  
I play the villain  
You don't know where we've been  
Go  
Lining 'em up again  
Start your engines  
Lining 'em up again  
Start your engines  
Lining 'em up again  
Start your engines  
Start your engines  
Can we get the chemicals in  
Old English is making me manic  
I go to SuicideGirls again  
To check on anything I missed  
The stitches don't even begin  
To even stop up the bleeding  
Can we get the chemicals in

'Cause anything's better than this  
The city is dying  
(Atleast to me)  
The city is dead now  
(My kingdom for a friend)  
Are you even trying?  
(To find some peace)  
Don't need a reason  
(I get some living in)  
'Cause I keep bad company  
I'm in trouble  
It's a last chance, stay away from me  
I play the villain  
You don't know where we've been  
Lining 'em up again  
Keep saying, "This will end"  
I keep bad company  
I'm in trouble  
Keep saying, "This will end"  
Lining 'em up again  
You know I'll never change  
Lining 'em up again  
Start your engines  
Lining 'em up again  
Start your engines
