

New World Order

The Kovenant

Stand aside for the new world order
Systematic, aristocratic
Don't deceive yourself, get out of the way
We command and you obey Beautiful to be the joker
Cursed by an all to human future
Things you cannot defeat, you start to believe in
New generations, synthetic nations I am your loving hate
(This is a new world)
I am your loving hate
(This is a new world) New world order
New world order
New world order
New world order Old-school fascism is on the rise
Narcissistic, evangelistic
So many things are only here to be hated
No need for love when the world is sedated Beautiful to be the joker
Cursed by an all to human future
The world burns with death as a lover
It's systematic for the coming new order I am your loving hate
(This is a new world)
I am your loving hate
(This is a new world) New world order
New world order
New world order
New world order Worldwide genocide
Mass religious suicide
Immoral seduction
Digital corruption I am your loving hate
(This is a new world)
I am your loving hate
(This is a new world) New world order
New world order
New world order
New world order
