One With the Antichrist

Mystic Circle

We are one with the antichrist
We are one with our master satan
Have you ever seen the darkened eyes
And the flames of immortal powerIn the deeps of hell we arise
And we came to destroy christianity
By our side unholy armees will ride
And satans kingdom is build soonIn the desert where all deamons came out
Five of satanas lightkillers were born to destroy
In the name of satan they were pointed as snakes
and they saw all christians as their enemies
For a dream of a new dawn where no light exist and a
New regime of the unholy is built
In the sign of satan they were ready to fight with their weapons
Who were the sword and the flameYou'll dieFive crooked grosses they bounded their way with the hell
Unholy curses they bounded their way with the deadAnd in the silence of dersterly lounliness
Praying the luzifer and his ghost
And in the lounliness of desert storms and winds
Rituals of the godfathers doneOh belial save our trip and missionFrom the stars a helldog came lead all their souls into the lights
It were the master of their dreams manipulate their brain
From the hell arise the world deamons cating dead bodys on the graves
Forture and death is in their veins suffer and pain in their soundsWe are the serpants of unholy time
The true deadbelivers of eternerty"seven sins the devils will
serpants shell rise"In the night all sadistic souls came to bring their
pleasures to unholy spirits
and they will fight
Put their lives for a satan work and they built
invasions of armageddon
and they will fightRaces will die and the blood all will flow
feeling the evil inside
lords of destructions will guide us the way
all for our brothers of lust will be sinnedThe fallen one had won the battle religions are destroyed
a new race for the evil god will stand for its own victory
