

# Day One

## Tamia

We beat the odds together  
Didn't care when they said we'd never last  
We kept our eyes on our own path  
Time flies and we watch the others  
Fall apart when they once were lovers  
Who everyone said would make it through  
How far we've come darling look at us...

If I could do it all again I would  
Give me the bad days along with the good  
My heart is even more in love  
Then it was on day one...  
Funny how it all falls into place  
We grow even closer with every mistake  
Its crazy how we're still in love  
The way we were on day one...

Who said the road was easy  
Our hearts were put to the test believe me... yes  
But still we found our happiness  
No one knows what the future holds  
But right here and right now I just want you to know  
We got a bond unbreakable  
We're so in love... darling look at us

If I could do it all again I would  
Give me the bad days along with the good  
My heart is even more in love  
Then it was on day one...  
Funny how it all falls into place  
We grew even closer with every mistake  
Its crazy how we're still in love  
The way we were on day one...

We haven't been without our issues  
But I'm so blessed to do this with you  
What a journey that we've been through  
Look at us...

If I could do it all again I would

Give me the bad days along with the good  
My heart is even more in love  
Then it was on day one...  
Funny how it all falls into place  
We grew even closer with every mistake  
Its crazy how weâ€™re still in love  
The way we were on day one...
