

Butterflies

Medina

Go ahead and make a move. Don't be shy.
Show me what you wanna do go ahead and try.
I'ma stay right here all night, me, my girls and I.
Go ahead and make a move, give me a try.
With all these women on the floor, how can you decide?
I know what you came here for I'ma get you right.
I'ma stay and wait for you, I know what you like.
Go ahead and make a move. All I know is that you're feeling me, feeling me.
And I can see the way your eyes are all over me.
All I know is that I wanna be, wanna be.
The one who lights you fire.
All I see is shadows in the light,
Moving all around me shining in the night,
Giving me dancing butterflies,
Playing all around me, feeling on the inside. Go ahead do what you do, now we can't deny.
Everybody in this room knows that we can fight.
I'ma show you how I do, be a butterfly.
I'ma dance all over you. All I know is that you're feeling me, feeling me.
And I can see the way your eyes are all over me.
All I know is that I wanna be, wanna be.
The one who lights you fire.
All I see is shadows in the light,
Moving all around me shining in the night,
Giving me dancing butterflies,
Playing all around me, feeling on the inside. All I see is shadows in the light,
Moving all around me shining in the night,
Giving me dancing butterflies,
Playing all around me, feeling on the inside.
All I feel is butterflies, dancing in the shadows.
All we got is strobe lights, moving to the energy.
All I feel is butterflies, dancing in the shadows.
All we got is strobe lights, moving to the energy.
All I see is shadows in the light,
Moving all around me shining in the night,
Giving me dancing butterflies,
Playing all around me, feeling on the inside.
All I see is shadows in the light,
Moving all around me shining in the night,
Giving me dancing butterflies,

Playing all around me, feeling on the inside.
All I feel is butterflies, dancing in the shadows.
All we got is strobe lights, moving to the energy.
All I feel is butterflies, dancing in the shadows.
All we got is strobe lights, moving to the energy.
