

Monster Love

Goldfrapp

I never thought I would return
To be consumed by you again
Think you're cured, you'd see it come
The folly of a monster love like you
Grey is good, the light is good
We went down to Hollywood
You only get one chance in Tinsel Town
I save the part, the sweetest part shook for you
Everything comes around
Bringing us back again
Here is where we start
And where we end
Never thought I would return
To be consumed by you again
But I know a paper moon
The folly of a monster love like you
The pavement smell just after rain
The sun leaps out, it's clear again
I told you how I felt the earth could move
The folly of a monster love like you
Everything comes around
Bringing us back again
Here is where we start
And where we end
Everything comes around
Bringing us back again
Here is where we start
And where we end
Everything comes around
Bringing us back again
Here is where we start
And where we end
Everything comes around
Bringing us back again
Here is where we start
And where we end
Everything comes around
