

Spotlight

Dexter Freebish

You're the one they want so give 'em what they need
A temporary touch
Feeling so ashamed, don't wanna take the blame
Thinkin' it's too much
So now you've had a taste of what it's like to be
Sittin' in the spotlight or would you rather be
In someone else's shoes
Not knowin' who you are
But it's not the end of the world quite yet
And all of these things will get better I bet
Who do you believe now that you're in the spotlight
What do you choose to do?
You come in through the side door, people always want more
What are you gonna do?
'Cause you're the one they want so keep 'em on their knees
Keep them asking please, please, please
They're eating from your hands, you make them understand
What it is to bleed
So now you've had a taste of what it's like to be
Sitting in the spotlight or would you rather be
In someone else's shoes
Not knowing who you are
But it's not the end of the world quite yet
And all of these things will get better I bet
Who do you believe now that you're in the spotlight
What do you choose to do?
You come in through the side door, people always want more
What are you gonna do?
But it's not the end of the world quite yet
And all of those things will get better I bet
Who do you believe now that you're in the spotlight
What are you gonna do?
You come in through the side door, people always want more
What are you gonna do?
Who do you believe now that you're in the spotlight
What do you choose to do?
You come in through the side door, people always want more
What are you gonna do now that your life is through?
