

# Convince Me

## Descartes A Kant

Please, please convince me  
Please, please, please convince me  
Tell me so it makes sense to me  
How much better is I wanna be  
And please, please, please convince me  
Please, please, please convince me  
Tell me so I understand  
Talk to me and hold my hand  
And please, please, please convince me  
Please, please, please convince me  
Tell me everything's gonna be alright  
Even if it takes our lives, please  
Please, please convince me  
Please, please, please convince me  
I've been troubled and I've been blue  
Tell me something good, tell me something new

Please, please, please convince me  
Please, please, please convince me  
Tell me what it's all about  
Tell me things will work out  
And please, please, please convince me  
Please, please, please convince me  
The whole wide world is falling apart  
The whole wide world bought our broken heart  
So please, please convince me  
Please, please, please convince me  
Please, please, please convince me  
Please, please, please convince me  
Convince me, baby, convince me, baby  
Convince me, baby, convince me, baby  
Please convince me, baby, convince me, baby  
Convince me, baby, convince me, baby
