Forsake Not The Dream

Trivium

Been down this road too many times
You taught me how it feels to die
We learn what it feels like
To feel pain for the first time
We learn what it feels like
To suffer
Give me the strength
To face what's in front of you
In front of me
By any length
To face what's in front of you
In front of me
I watch it fall before my eyes
This dream we've built for our whole lives
We learn what it feels like
To feel pain for the first time
We learn what it feels like
To suffer
Give me the strength
To face what's in front of you
In front of me
By any length
To face what's in front of you
In front of me
Vanquish that which kills you, darling
Forsake not the dream

Through the world, I feel I'm falling
Forsake not the dream
Crest fall in
On the crestfallen
Collide
And collapse
Crest fall in
On the crestfallen
Collide
And collapse
Give me the strength
To face what's in front of you

In front of me
By any length
To face what's in front of you
In front of me
Vanquish that which kills you, darling
Forsake not the dream
Through the world, I feel I'm falling
Forsake not the dream
Forsake
Forsake
Forsake not the dream
Forsake
Forsake
Forsake not the dream
