

Time

Az

[Nature]At the right major 24, I'd done seen it all done it all

Some dreams stay fresh and some are spoiled

Dealing with time went to spring, summer, fall

Its crazy changes, is this that made me famous?

I come a long way from Timbs, minimum wages

Stocking caps summer jobs pockets flat

It's funny how my childhood idols now be coping cracks

Ain't knocking at them, fortunately life is too short to see

It's only right we move accordingly at every second

I use to carry heavy weapons, previously cocked

Tucked in my shirt for every session, but hold up

The two-six beer made me grow up

Came home to the damn same dream with no luck

And half the clique strong, the other half moved on

Some with new lives and new wives niggaz live long

The foulest thing about time is still ticks when you gone

[Nas]For those who lived the way I lived we came from a long way

From wiping coal from our eye lids from raps hottest

Smoking lye to the track guidance, 'member back then

Before mack 10's expensive bottles, had a sick mind

Niggaz taught me how to get mine

We often sit courts they get tossed that get spit lines

To all niggaz that the Lord seemed to legit time

Why we plan to live for-ev he had a different design

Is it safe to say we all parish on the sacred day

With my luck soon as I reach the gate that made me pay... pray

Minutes go by indo-go-high the specialist decked out dark specks finessing

Used to play catch a kiss same girls back then now leave us messages

A whole lot, travel to my old spot where we sold rock although it's trifle

Ain't nothing changed as like time is cycle

[AZ]Yo, wake up to the world stay in charge of your dream

Keep your vision focus get wise and large your cream

Marketing scheme so many in the dark it's un-seemed

Caught up between perhaps rap was a fortunate thing

Forced to be king from hustlin to supporting them fiends

Busting guns, I had no remorse as a team

Rocking bird stones my first get big nursed a dome

Its hurts to zone now I realize I'm on the surface alone

Time ticks devilish mind design quits leave you line quick
And cause you to die behind shit, mathematics
Master 120 I'm Aziatic, I'm amazed with magic
Cousins with loosen that made me savage
Life changed once you established with the right game
Love the night vane found the new way to fight pain
Clocks never stop its all the way to the top
Trying to freeze time that's why I iced the face on my watch
