Big in America

The Stranglers

I met a roach in America
His family had a massive tree
They live just about everywhere
He was big in America
He was big in America

I met a vet in America
He was alive he was in overdrive
He'd just been around everywhere
He was big in America
He was big in America

And when you're big in America
You like to live in America
You won't be on your own
And since you've big in America
You might as well make America your home

Big in America

I met a girl in America
She wore the pants
Cross a big expanse
She was whippin' men everywhere
She was big in America
She was big in America

I met a car in America
The bumper hit lucky I was fit
I was limping 'round everywhere
It was big in America
It was big in America

And when you're big in America
You like to live in America
You won't be on your own
And since you've big in America
You might as well make America your home

Big in America
