

# Endless

## Blume

Here I stand on the shore  
It brings calm and feels like home  
A breathless whisper will heal my wounds  
The night will cover all silent tears  
For endless days  
For endless vibes  
Letâ€™s get away  
To find the light  
For Endless nights  
For endless vibes  
Letâ€™s get away  
We rise from grey  
Rain of clouds around me  
I fall inside your blue eyes  
A breathless whisper will heal my wounds  
The night will cover all my fears  
For endless days  
For endless vibes  
Letâ€™s get away  
To find the light  
For endless nights  
For endless vibes  
Letâ€™s get away  
We rise from grey
