Watergate

Head Control System

watergate
scenery twisted
as i slip off the back of the rock
that's so hard to hold on to
and what a day you left me
you went through the back door
you knew there was no hopeand i wish you were back there
to see what's going on
and i wish you could be here
to see what's going onwatergate
serious twist it
as i stab at the back weave of thread
form fabric of existence
and what a way
you let be
you went through the black doorand i wish you were back there
to see what's going on
and i wish you could be here
to see what's going onand i wish you could be here
