

# I'll Do Anything

**Gordon Lightfoot**

Down in the warm dark part of my heart you stay  
I've been on my own for so long as I stand here today  
I'd never leave you, I'll do anything that you sayI've been around some walking on the down the street  
Feeling as low as the shoes on the soles of my feet  
Taking dead aim on fortune and fame you might say  
Playing guitar doesn't make you a star anywayMany's the time I've wished that I were free  
But my love for you was too deep for my eyes to see  
I'd never leave you, I'll do anything that you sayWhenever the thought seems better off left alone  
I think of you then in a way that is ten times as strong  
Taking dead aim on fortune and fame you might say  
Playing guitar doesn't make you a star anyway
