

It's Over

Patti LaSalle

It's over, it's over, it's over now
it's over, that's all there is
no more lonely tears
that's how it is for now it is over.

Everytime you broke my heart I tried to make you see
you were driving us apart - but you only laughed at me
it's over, the tables turned and all of the bridges burned
that's how it is for now it is over.

Don't try to lie again, I promised to be true
maybe I would cry again but never after you
nothing you say or do could bring back my love for you
that's how it is for now it is over.
