

# If

## Kelly Price

If I could love you  
If you had came into my life before  
If I could turn and walk away  
I would if I could but I can't so please understand If I could kiss you  
If I could hold you in my arms awhile  
If I could be with you tonight  
I would if I could but I can't so please understand Baby, baby, baby  
I've been wondering  
Whatcha doing now  
And how your life has been And now I see you baby  
'Cuz you're back again  
And you wanna know  
If we can kick it again? But so much has changed now  
I gotta man and some kids  
I've got responsibilities  
So I can't just up and leave  
But I wanted you to know that "It's our secret baby"  
Is what you said to me  
But there's too much at stake  
My home, my family The thought is tempting baby  
But I won't be weak  
Can't go out like that  
Never, no way, no how not me Another life, another space  
Another time, another place  
But not right here and now  
I gotta honor my sacred vows Passions high, desire strong  
It's feeling right but this is wrong  
And I'm not that kinda girl  
I gotta go home to my world
