In The Veins

Semisonic

Red is the ocean which we ride
Carried along on a changing tide
Blind, blind rage and pure delight
Running in the current side by side
(Waiting for whatever we haven't tried)
Baby it's amazing all the things a self contains
Peace is in the veins, in the veins
(Be careful what you put in there)
(Be careful what you put in there)
Heaven transcendence, angels fly
Anger and vengeance, blue, blue sky
All injected from the mind
Down in the liquid world combined
(And your prescription has been signed)
Search the wild green outside and inside is what remains
Peace is in the veins, in the veins
(Be careful what you put in there)
(Be careful what you put in there)
Wide open world there is no mind without you
And a little bit is not enough
Wide open mind divine the world about you
And a little more is not enough
A little more is not enough
Baby it's amazing all the things a self contains
Peace is in the veins, in the veins
Peace is in the veins, in the veins
(Be careful what you put in there)
(Be careful what you put in there)
In the veins
(Be careful what you put in there)
(Be careful what you put in there)
(Be careful what you put in there)
