

Paragon

Prisma

Caroline, inspiration true
Left it all behind and turned her hand to something new
Suddenly left for better shores
With the kind of reckless abandon that we applaud
If I could, I would follow you
Caroline showed us what to do
Made it on your own terms oh yes, we look up to you
You call the tune
And if I could I would fly through the air
I would fly out to meet you
Cross the void and travel interplanetary
Oh! Lets go, stick it to the rules we wanna be like you oh
I can see your light up in the sky, moving over city satellites
Pick me up, take me to another solar system I can cut, oh
Help me find the strength to follow through
Caroline I couldn't do it without you, oh
Stuck in a rut, sunk inside a groove
I could disappear here, all my instincts say it's true
I wanna do something that has merit to it
That will strike a chord and resonate as far as you
Oh if I could, I would fly through the air
I would fly out to meet you
Cross the void and travel interplanetary
Oh! Lets go, stick it to the rules we wanna be like you, oh
I can see your light up in the sky, moving over city satellites
Pick me up, take me to another solar system I can cut, oh
Help me find the strength to follow through
Caroline I couldn't do it without you
Oh do you think that I could ever make a difference
If I really try?
Help me find a way to cut loose
Caroline I couldn't do it without you
I was unaware that you were gonna go
I didn't know you well enough to know
I've always thought of you and how you're moving on
On, on, yeah you're a real paragon
On, on, on yeah you're a real paragon
On, on, on yeah you're a real paragon
On, on, on yeah you're a real paragon
If I could I would follow you
If I could I would follow you
If I could I would follow you
