

Through the Night (Chris Lake Mix)

Cedric Gervais

[Coco]

You and me alone on the road tonight
Won't pay too much attention to what others may like
Just lay down in the desert side by side
I wonder what you look like in the morning light
I wonder what you look like in the morning light Maybe the fire will burn out tonight
I'm not afraid of the dark
Baby, the sunrise will be almost out
I'm not afraid of the spark I can take you through it
I can take you through it
I can take you through the night
I can take you through it
I can take you through the night You said you never lived before you chose to die
Loneliness is never just a state of mind
You said I'll walk a mile for you just tell me why
But baby there's no answer to the meaning of life
But baby there's no answer to the meaning of life Maybe the fire will burn out tonight
I'm not afraid of the dark
Baby, the sunrise will be almost out
I'm not afraid of the spark I can take you through it
I can take you through it
I can take you through the night
I can take you through it
I can take you through it
I can take you through the night
