

Better Daze

OPM

assination from the kid of creation
blazin disaster by devious station
face it
a permanent vacation
for tastin from the tree of temptation
blazin it hazin
but never quite placin
the movement of the stars
or the world on rotation
token and smokin from la to oakload
in some dreams im drownin and others i be chokin
money money make the world go round
money money just bring me down now
and im lookin for the higher ground
hey now lets start nominatin
so long i live my life of sinnin
i know i got to change my ways
im waiting on better days
hey now lets start...i don't give a fuck and let me tell you why
i woke up this morning and i got high
the day passed and the stars went up
i made my mark and I heard bump bump
there's a voice in the back of my head
another death and blood been shed
evil lurks in the hearts of men
dollar signs on every sinmoney money make the world go round
money money just bring you down
and im lookin for the higher groundhey now lets start nominating
so long I live a life of sinnin'
i know ive got to change my ways
im waitin on better days heymoney talks and everybody listens
nobody stops on the point that they're missin in the system
where every price could be right
even if the price is the loss of another life
we used to be stick up
kids regret the things that we did
tryin to live positive
when friends were doin thismurderous attackers
battling fassions

Benjamins and Jacksons at the heart of the actions
think you would be missed if you didnt exist
so stay the the hell off my muthafucking shit listmoney money make the world go round...
