Cherry Picker

Classic Jack

you came to me when i was in a dream
and told me you could fulfill all my fantasies
and now i see what you really need
is the light that burns inside of every part of me

you piece of shit i paid my fucking dues
this is only between me and you
don't drag them into this it's not their fault
their innocence is all they've got

you stole from me all my hopes and dreams
you told me that i couldnt help anything
and now i see what you really need
is the blood drained out every fucking part of me

i'm sick of this
i cant keep stealing them
i'll do this one more time then take it away
please stay away from me
i will take everything
i am the reason you're in church on sunday

i cant believe this
i gave you everything
easy to see why you cherry picked me

i paid my dues
me and you
not their fault
all they've got...
