I Will Remember You

Ryan Cabrera

Eight years later, time goes by fast
Got my memories and they will last
I try to keep it simple 'cuz I hate goodbyes
I try to keep it simple by telling myself that
I, I will remember you and all of the things that we've gone through
There is so much I can say, but words get in the way so
We're not together, I will remember you
I will remember you
We're a picture in my mind
And when I wanna find you, I just close my eyes
You'll never be that far from me so don't say goodbye 'cuz
You'll never be that far from me, I'm telling myself that
I, I will remember you and all of the things that we've gone through
There is so much I can say, but words get in the way so
We're not together, I will remember you
You were there when I needed a friend
Thank you, thank you
I never told you how much that meant
God, thank you, thank you
I will remember you and all of the things that we've gone through
There is so much I can say, but words get in the way so
I, I will remember you and all of the things that we've gone through
There is so much I can say, but words get in the way so
We're not together, I will remember
We're not together, I will remember you
Ooh, I will remember you
