

Bloody Mary [Nerve Endings]

Silversun Pickups

Drown you out
And left you with a sound
We'll spoil good nights
Replacing lullabies
How could they never notice
What they planted in your spades
See you laughing in a picture
But I know what's out of frame
You barely cried
But you made it all alive
And I'm so proud
That your in my hands now
If we grew up together
You would find its not the same
I want to jump inside a picture
And show you a new game
If we stay here long enough
we can play with Bloody Mary
Say her name into the dark
Activate our nerve endings
If we stay here long enough
we can play with Bloody Mary
She will chase us through the dark
Activate our nerve endings
We'll Stay..
I'll never let them get closer
Or shower you with any blame
Now we dance in our own picture
Where the rules have changed
If we stay here long enough
we can play with bloody Mary
Say her name into the dark
Activate our nerve endings
If we stay here long enough
we can play with Bloody Mary
She will chase us through the dark
Activate our nerve endings We'll Stay..
