

I'll See It Through

Texas

When you touch me
I feel there's nothing you can do to turn me away
And I know that in the past you've had bad luck
So I should help you stay You're all I ever wanted, you're all I ever needed, it's you
You're all I've ever wanted
And loving you's the right thing to do
And I'll see it through When I close my eyes and think of you
It takes me places that I've never seen
And the rain, it blows
You're brushing up against my skin to wash me clean You're all I ever wanted, you're all I ever needed, it's you
You're all I've ever wanted
And loving you's the right thing to do
And I'll see it through I'll show you the love in my head
I'll show you the love that we had
I'll show you the love in my head
I'll show you the love that we had You're all I ever wanted, you're all I've ever needed, it's you
You're all I've ever wanted
And loving you's the right thing to do
You're all I ever wanted, you're all I've ever needed, it's you You're all I've ever wanted
And loving you's the right thing to do
And I'll see it through
