## I'll See It Through

## **Texas**

When you touch me
I feel there's nothing you can do to turn me away
And I know that in the past you've had bad luck
So I should help you stayYou're all I ever wanted, you're all I ever needed, it's you

You're all I've ever wanted

And loving you's the right thing to do
And I'll see it throughWhen I close my eyes and think of you

It takes me places that I've never seen

And the rain, it blows

You're brushing up against my skin to wash me cleanYou're all I ever wanted, you're all I ever needed, it's you

You're all I've ever wanted

And loving you's the right thing to do

And I'll see it through I'll show you the love in my head

I'll show you the love that we had

I'll show you the love in my head

I'll show you the love that we had You're all I ever wanted, you're all I've ever needed, it's you

You're all I've ever wanted

And loving you's the right thing to do

You're all I ever wanted, you're all I've ever needed, it's youYou're all I've ever wanted

And loving you's the right thing to do

And I'll see it through
