

# Beneath Black Skies

## Coltsblood

This reprisal search for words  
Analyse what it's worth  
Set the stars ablaze from earth  
In thoughts sublime we immerseAnother fear I can't see  
All blown awayYou say you'll never run away  
From a certain pointing lightBeneath black skies I search for words  
Hell relies on what is worse  
Heaven lies on sullen earth  
Fall then rise  
Fall then birthAnother fear I can't see  
All blown awayYou say you'll never run away  
From a certain point in lifeIs there something wrong?  
Nothing I sense no belong
