This Fire

Lisa Miskovsky

You can dodge, you can do it
You can do it aloneYou can try you can try
But you know it is strongHow long will this fire burn
How long will this fire burnWe were moving, we were moving
And had nowhere to go
We were changing destination, hunting high and lowYou deny it, you deny it
But it's all in my head, is it over now
Is it over nowLove is such a monster, love
Be careful where you step
Be careful where you lay down boy, lay down boyWe were giving, we were giving everything that we knew
Got to give us, got to give us something else to doWe were trying, we were trying 'cause you told us to
Got to give us, got to give us something else to doHow long will this fire burn
How long will this fire burnSee you working, and i'm working and you snuck on a change
This reflection is a problem you can easily derange
Had a vision, had a mission, but it's all in my head
It is over now, it is over nowLove is such a monster, love
Be careful where you step
Be careful where you lay down boy, lay down boyWe were giving, we were giving everything that we knew
Got to give us, got to give us something else to doWe were trying, we were trying 'cause you told us to
Got to give us, got to give us something else to do(All to make a change my friend, we tear apart the the tune i planned)How long will this fire burnHow long will this fire burnHow long will this fire burnHow long will this fire burnHow long will this fire burn
