One False Step

Cubicolor

The waters here run deep
And you I'll never leave
Counting out your steps

How you taste so sweet
But you are not for me
I'm falling out of context
There's miles before I sleep
There's miles before I sleep

Just one false step
Darling you know I'm dead
Just gotta find my thread and follow

I'm getting tired of the reasons why
Growing blind to the seasons I
Can't live on the edge of sleep
How I made all the meanings traps
The suggestions are not mine
The sky is full of bold light
There's miles before I sleep
There's miles before I sleep
There's miles before I sleep

Just one false step
Darling you know I'm dead
Just gotta find my thread
And follow
Just one false step
Fly me away I'll tread
Just gotta find your thread and follow
Ohh
Ohh
Ohh

One false step
Just one false step

Just one false step
Darling you know I'm dead

Just gotta find my thread
And follow
Just one false step
Fly me away I'll tread
Just gotta find your thread and follow
Ohh
