

Little Bits of Lightning

Martina McBride

I have listened to the sound
Of a lonely night
Gone a thousand miles
Through a storm-filled sky
Looking for some light Never dreamed of turning back
But faced the wind instead
'Cause I knew somewhere
You'd be waiting there
Down the road ahead All throughout the longest night
Your burning light did shine
Like little bits of lightning
Lighting up the whole world with your flame Every day to make it better
Strong enough to carry the weight
Your love became my saving grace
Like little bits of lightning
Shining through the rain If I should ever lose my way
Find the strength in me is gone
I won't worry what to do
'Cause darlin' I know
You will come and take me home All throughout the longest night
Your burning light did shine
Like little bits of lightning
Lighting up the whole world with your flame Every day to make it better
Strong enough to carry the weight
Your love became my saving grace
Like little bits of lightning
Shining through the rain Strong enough to carry the weight
Your love became my saving grace
The kind of feelin' words can't explain
Like little bits of lightning
Shining through the rain
Like little bits of lightning
Shining through the rain
