The Planets

Animaniacs

It's time to tour the planets that make up our solar system, come on
The closest to the sun is the planet MercuryNext the shrouded planet Venus
Is as covered as can beThe Earth is next, we call it home
Let's hope it stays that wayAnd then there's Mars, it's really red
What more can I say?The gassy planet Jupiter's
As big as planets comeThen there's Saturn with its mighty rings
Made up of tiny crumbsWe travel on to Neptune
That's a gassy-freezy ballAnd cold and tiny Pluto
It's the furthest one of allWell, there you go, that's our solar system
You forgot Uranus, goodnight everybody
