

# The Planets

## Animaniacs

It's time to tour the planets that make up our solar system, come on  
The closest to the sun is the planet MercuryNext the shrouded planet Venus  
Is as covered as can beThe Earth is next, we call it home  
Let's hope it stays that wayAnd then there's Mars, it's really red  
What more can I say?The gassy planet Jupiter's  
As big as planets comeThen there's Saturn with its mighty rings  
Made up of tiny crumbsWe travel on to Neptune  
That's a gassy-freezy ballAnd cold and tiny Pluto  
It's the furthest one of allWell, there you go, that's our solar system  
You forgot Uranus, goodnight everybody
