

We Know Where You Go

Blue October

I never knew you felt this way
Even on a sunny day
I wish I could've seen your pain
I would've never let you walk away
How could I let it get this far
Tell me what you're going through
'Cause every time you run away
Just know I follow you We know where you go
We're watching you close (every time you run away)
And we know where you go (moving up and fall away)
We know that you've tried
Your heart's died and goodbye (every time you run away)
Seems the only way to go but please stay with us (every time you run away) I see your heart light fade
I know you're hiding in the woods where you would sing to us from high up in the trees
Look, I want my friend back We know where you go
We're watching you close (every time you run away)
And we know where you go (moving up and fall away)
And we know that you've tried
Your heart's died and goodbye (every time you run away)
Seems the only way to go but please stay with us (every time you run away) If only for a moment
You'd open your eyes
And see the you that I knew before
If only you could own it
Open the skies
So you could feel the rain fall
Wash away the night crawl
Reaching for an end to your war
'Cause we would give you anything and more We know where you go
We're watching you close
And we know where you go And we know that you've tried
Your heart's died and goodbye (every time you run away)
Seems the only way to go
But please stay, but please stay with us (every time you run away) We know where you go
We're watching you close (every time you run away)
And we know where you go
Oh! And we know that you've tried
Your heart's died
And goodbye seems the only way to go (every time you run away)
But please stay (every time you run away)

Please stay with us
