

# My Lady

Kevin Lyttle

You want me, I want you, let's go someplace, just us two  
You touch me, I'll touch you, undress me and I'll turn you  
Upside down and spin you round and round  
And make you moan, so why don't you come be my lady?  
Baby, just picture the scene, me and you down by the sea  
Sipping on ice [unverified], living a freaks fantasy  
And so many things I wanna do, so it would  
Really be cool, if you would come be my lady  
Girl now, the picture you set and you're standing there wet  
You might as well take off that dress, so I can relieve your stress  
I'll take you where you haven't been before, I'll give you  
The real hardcore, if you would come be my lady  
You want me, I want you, let's go someplace, just us two  
You touch me, I'll touch you, undress me and I'll turn you  
Upside down and spin you round and round  
And make you moan, so why don't you come be my lady?  
I got a penthouse on the beach, just tell me what time we can meet  
I'll manifest your wildest dreams, simply your peaches and creams  
So many things I wanna do, it would really be cool  
If you would come be my lady  
When you're ready to be satisfied, call me, I'll send my ride  
To bring you back to my hide, tasting so sweet, you can't deny  
I'll take you where you haven't been before, I'll give you  
The real hardcore, if you would come be my lady, c'mon  
You want me, I want you, let's go someplace, just us two  
You touch me, I'll touch you, undress me and I'll turn you  
Upside down and spin you round and round  
And make you moan, so why don't you come be my lady?  
Girl, I want you to say my name, do it over and over again  
On the balcony, under the moon, we will do what we wanna do  
And we can freak the night away, until another day  
Giving you the real hardcore, if you would come be my lady  
You want me, I want you, let's go someplace, just us two  
You touch me, I'll touch you, undress me and I'll turn you  
Upside down and spin you round and round  
And make you moan, so why don't you come be my lady?
