Not Long for This World

Kelly Willis

We're not long for this world
We're not long for this world
And the way I can tell is
I know you too well
We're not long for this worldI know the words that you say
And the words that you mean
And I remember the days
When you meant everythingWe're not long for this world
We're not long for this world
And the way I can tell is
I know you too well
We're not long for this worldYou hold me close in your arms
And I feel the cold
Oh, but you never meant any harm
By the lies that you toldWe're not long for this world
We're not long for this world
And the way I can tell is
I know you too well
We're not long for this worldYes, the way I can tell is
I know you too well
We're not long for this world
