

When Sound Had Feel

R. Scott

Back when sound had feel
Everyone stood tall
Passion drove us
Into the unknown

Life is like a mirror
Reflecting back at us
Victories and the failures
Lessons still to come

When sound had feel - we were young
When sound had feel - we were one
When sound had feel - the lions roared and shook us all awake
When sound had feel - we were one

There's a strange, familiar chill
Comin' through the wire
Instead of building up
We just put up a wall

The promises we made
Have taken to the wind
Walking side by side
We know it's not the same

When sound had feel - we were young
When sound had feel - we were one
When sound had feel - the lions roared and shook us all awake
When sound had feel - we were one
