

Love Technology

Popsie

Take me advice and get your own device
A magic wand will take you beyond
Don't feel ashamed it's only a game
Forget reality, reach trance
Give our body a physical romance

Chorus:

Use your love technology
To please your body biology,
it's only a game

Use your love technology
To please your body biology

Love tec, technology

Push up the top gear on your little spear
It's getting hot while hitting the girlee spot

When your on fire it quench you desire

It's not a sin so let the game begin

Just feel the vibration

Mmm bloodsystem in circulation

Chorus

Live out your fantasies with this machine

It will take you to places you never been

While looking for a loving friend

This nicety substitute we recommend

It's never to late for an erotic state

Try this treasure for you pleasure

Chorus
