You've Got a Lot to Answer For

Catatonia

You've got a lot to answer for, but baby I love you
You've got a lot to answer for, but baby I love youIf it turns to blue, what are we gonna do
If it stays on white, will it be alright
If it all turns sour, it's too lateThe CSA are bound to find you soon
If you wanna talk, then talk about it
You could talk all night if you needed
You could talk all night and dayBut I'd think by now you know exactly
How to end up here
Looking for the sun
Are you looking out for me?You've got a lot to answer for, but baby I love you
You've got a lot to answer for, but baby I love youYou said I got the looks
Well, I got the means
Let's get together, mix each other's genes
Can't buy myself a futureMy DNA will be past it's sell by date
You looking for a son?
Are you holding out for me?You've got a lot to answer for, but baby I love you
You've got a lot to answer for, but baby I love youYou've got a lot to answer for, but baby I love you
You've got a lot to answer for, but baby I love youYou've got a lot to answer for
