

Drag You Down

Finger Eleven

It's biting, it's teething, it's biting, I'm bleeding
It's calling, it's crawling, it's calling and I'm falling The perfect sound of middle ground
Pull me under before I try to drag you down
Someone has to pull me under before I try and drag you
Drag you, drag you down They're fighting, they're growing
They're fighting and they're growing
I'm biting, I'm teething, I'm biting, they're bleeding The perfect sound of middle ground
Pull me under before I try to drag you down
Someone has to pull me under before I try to drag you
Drag you, drag you down Biting and teething and bleeding Pull me under before I try to drag you down
Someone has to pull me under before I try to drag you down
Someone has to pull me under before I try to drag you down
Someone has to pull me under before I try to drag you
Drag you, drag you down
