If Looks Could Kill

[T. Tex Edwards](#)

Tell me where it all went wrong
Maybe I can make it better
Tell me where it all went wrong
Don't you know that you really upset her?
When you act like a man who is cross
With every woman he's never had
If it's true, looks could kill
And you will be the first to make me mad
Then you'll have to go
Is this the kind of fate you could contemplate?
A breakdown at my very sight

I promise hidden words of tenderness
In every single line that I write
Still, you act like a man who is cross
With every woman he's never had
If it's true looks could kill
And you will be the first to make me mad
Then you'll have to go, maybe you'll have to go
Is it true looks can kill?
Is it true looks can kill?
Is it true looks can kill?
