

...Like It Is

The Intersphere

Where do we go?...we grow... outgrow...
you make us understand that you would know where we go...
you legalize new legal highs
to make us realize that we should know how to grow
take us along...
tell me like it is
(don't want to)
bathe in your favourite swoon
(don't want it)
dished up in silver spoons
(don't need it)
what kind of medicine do you prefer?
tell me like it is
(don't want to)
abandoned your health too long
(can't help it)
where did it all go wrong?
(don't know it)
licked up the remedies
true or fake?
did we take an oath? proposed or supposed?
you make us understand that we are forced at worst
you give advice as one desires
pretended compromise - whose right to know
why does it take so long??
tell me like it is
(don't want to)
bathe in your favourite swoon
(don't want it)
dished up in silver spoons
(don't need it)
what kind of medicine do you prefer?
tell me like it is
(don't want to)
abandoned your hope it's gone
(don't want it)
where did it all go wrong?
(don't know it)
licked up the remedies

true or fake?
