

Unbreak

[Ryan Star](#)

I wanna know your whole skin, every mark, every inch
I wanna heal your pain, don't be scared, let me in
Lay yourself down, I will comfort you, I will comfort you
Until the stars fall around us For every dream that you lost, every tear that it cost
I will, I will unbreak you
All the pain that you feel, let this moment be real
I will, I will unbreak you
I will undo the hurt 'til it feels like I'm the first
I will unbreak you I wish I knew you when eyes were white and innocent
If I could cut through time, I'd hold you close, make you mine
Stay where you are, and I will come for you, I will comfort you
Until the stars fall around us For every dream that you lost, every tear that it cost
I will, I will unbreak you
All the pain that you feel, let this moment be real
I will, I will unbreak you
I will undo the hurt 'til it feels like I'm the first
I will unbreak you, I will unbreak you For every dream that you lost, every tear that it cost
I will, I will unbreak you
All the pain that you feel, let this moment be real
I will, I will unbreak you We can make it alright, you and me here tonight
I will, I will unbreak you
For every dream that you lost, every tear that it cost
I will, I will unbreak you
I will undo the hurt 'til it feels like I'm the first
I will unbreak you
