Reward

Fat Tulips

Rooms spin like hurricanes Walls begin to breath When will this be over Like it more Then i should Its taking over me When will this be over Fighting for you Struggling for you Waiting for you What do i do this for All for the high Why do i do this why All for the high I rummage through this disaster To find a reward Why do i do this why All for the high Torn in half again I still feel the same My head spins like a hurricane I cant see Right in front of me Through the shit inside of me When will this be over Fighting for you

Struggling for you
Waiting for you
What do i do this for
All for the high
Why do i do this why
All for the high
I rummage through this disaster
To find a reward
Why do i do this why
All for the high
My head spins
Lost control

When will this be over
My eyes roll
Look inside
When will this be over
What do i do this for
All for the high
Why do i do this why
All for the high
I rummage through this disaster
To find a reward
Why do i do this why
All for the high
