# Cold Condition

## Edison Glass

This one thing's for certain
We all need change
We wrap ourselves in blankets
To stay warmWell, it's still stinging
I can't feel my toes
Growing numb, I've come undone
I can't keep out the coldI don't want to shiver anymore
Are we alone?We need warmth to come
In our cold condition we need you to visit us
Warmth to come
The fire from inside to burn out all our livesDon't sew our hearts together
Love will be our friend
We'll dance again with no reason
And no one'll be shunnedAnd it's this moment we become alive
We'll dance again with no reason
And no one'll be shunnedWarmth to come
In our cold condition we need you to visit us
Warmth to come
The fire from inside to burn out all our livesI'll wait for you here
I wanna breathe and then let it go
Whisper, oh, he'll never knowWe need warmth to come
In our cold condition we need you to visitWe need warmth to come
In our cold condition we need you to visit us
Warmth to come
Fire from inside to burn out all our lives
