

# Out With The Boys

## White Lion

I've been looking Johnny I've been looking for you  
I know that you're out there doing what you shouldn't do  
I've been calling Johnny I've been calling for you  
The streets didn't answer me 'Cause they know that you're through I still recall the night when you almost took  
your life  
And we all were staying up all night  
To be right by your side  
Yeah we were out with the boys We were out to make some noise  
Yeah we were out with the boys  
We were out to make some noise  
I was searching Johnny, I was searching through town I heard that someone saw you lying around  
I was running, Johnny I was running out of time  
When I suddenly found you beat up and fallen apart  
I thought about the days when we were young and wild When every girl out on the streets  
Turned when we walked by  
Yeah we were out with the boys  
We were out to make some noise Yeah we were out with the boys  
We were out to make some noise  
If I could make a wish I'd take you back in time  
And we could be the way we were When we were out with the boys  
We were out to make some noise  
When we were out with the boys  
We were out to make some noise
