Three Single Words

Toxic Lab Rats

Feeling kind of sad now
I need you next to me
But things ainâ€™t working out
It struck me when
I thought of what I used to be

Thought my world went upside down
Struggling in disharmony
My soul cashed in
Iâ€™m living free

Three single words
Meant nothing to me
Three single words
Rubbing them into you

You donâ€™t seem to get it do you
I was always on your side
No matter what you tell me
Iâ€™ll stand up for my pride

Never said the things you heard
I spoke a different way
Donâ€™t try to be pretentious
I know the things you will say

I say we should go low
Try to spend some time
Let things out real slow at last
To see what we might find
