

# The Kill

## Fugazi

born into race and nation accept family and obligation  
i'm not a citizen i'm not a citizen  
embrace tradition and occupation  
cull memory for assimilation secure for future generations  
secure for future generations  
i'm not a citizen i'm not a citizen laying in this cold field  
waiting for the call feeling right here in this uniform i think i got  
them all academic or street education obtain degree in annihilation i'm not  
a citizen i'm not a citizen laying down in chambers waiting for the call  
seen your kind so many imes you got no chance at all laid out immobile  
hoping for that call it's in my mouth, under my skin sodium pentathol
