

# Julia

## Chris Rea

Eyes so bright  
So big and wide  
Make you feel so strange  
Somewhere deep inside It's the face of an angel  
The soul of the devil may care  
I'd love to know  
What goes on in there She needs your love  
She needs it every day  
But speak of love  
See her laugh and run away Julia  
Which way will you go  
Julia  
I wanna know Julia  
Only the moon and stars  
Julia  
Know just where you are Julia  
Julia  
Julia  
Julia See the dance  
That needs no alibi  
You don't need to dream  
When you know you can fly She needs your love  
She needs it every day  
But speak of love  
See her laugh and run away Julia  
Which way will you go  
Julia  
I wanna know Julia  
Only the moon and the stars  
Julia  
Know just where you are Julia
