

# Sun

## Halford

I want to steer for the sun  
For the day has begun  
It's saying, it's saying My soul just wanted to freeze  
To collapse and to seize  
From the waiting You know it matters to me  
That I have to rage free  
I was longing All that I feel is my soul  
I will never let go  
What I crave for All of the things that you need  
Are the things that you bleed  
Here 'em calling? And when the world becomes too much to me  
That's when I know that I can't stay  
I'm searching for my own serenity  
I know I have to get away I want to steer for the sun  
For the day has begun  
Here it calling? It's calling  
It's calling  
It's calling
