Out Of The Blue

Peter Frampton

Here I am on the road again
Don't know where I'm goin'
Wonder when the road will end
Guess there ain't no knowin'
Ooh darlin' this is out of the blue
I find I miss them little things you do
Look what this world has driven me to
Now I know oh should've stood by you
Wave goodbye to the things I loved
You know I feel weak inside
Now my home is the sky above
Trying to survive
I tell ya ooh baby this comes out of the blue
How I miss them little things you do
Look what this world has driven me to
Ooh, I know know should've stood by you
I've heard it said, but I know myself
You gotta carry on

I don't look that far ahead
'Cause I just know where I'm coming from
Ooh baby this comes out of the blue
How I miss the things you do
And look what the world has driven me to
Lord above knows should've stood by you
I've heard it said, but I know myself
You gotta carry on
I don't look that far ahead
I just know where I'm coming from
I tell you ooh baby this comes out of the blue
I find I miss them little things you do
Look what this world has driven me to
Lord above knows should've stood by you
Should've stood by you
Lord above knows should've stood by you
